

## Carrot / Möhren / Gulerødder

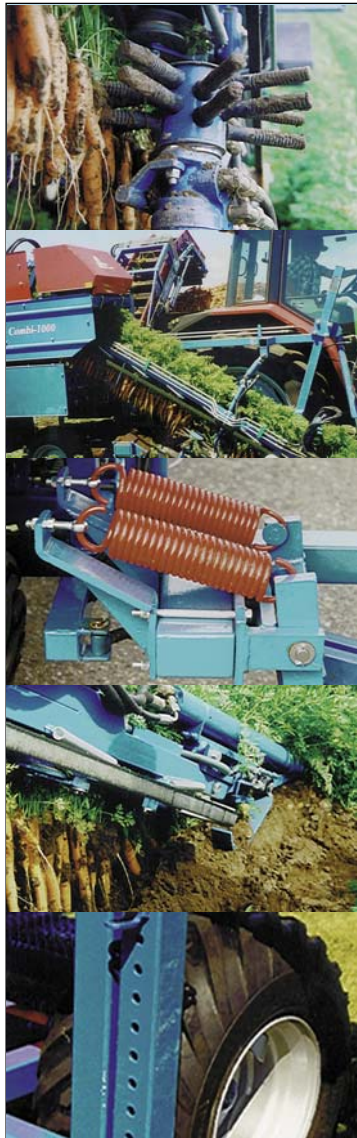

### Mounted / Montiert / Monteret

**Combi-1000**, is a combination machine which can be built to customers requirements. It features heavy-duty construction with a strong frame. High quality roller bearings and other wearing parts are made to last, offering reliability and low running costs. The low-angle pick-up section has belts extended back over the knives, providing excellent harvesting performance, even under difficult conditions.

The machine has the new 'floating knives' system which ensures perfect topping with effective stone protection. The Combi-1000 can be supplied in two variations; as an elevator model, (Combi-1000E) or with a sorting table, with equipment for handling boxes or big bags. A choice of hydraulic systems is offered, and a huge range of other options is also available. The Combi-1000 can also be supplied as an industrial model with cutting discs for crowning the crop.

To ensure the best solution for your own requirements, we recommend you to contact your nearest importer, or ASA-LIFT direct.

## Combi-1000

### Montiert/Monteret

Among many optionals, can be mentioned :

- Automatic height control on pickup section
