OT, WR & SL SERIES
ONION HARVESTERS

ASA-LIFT

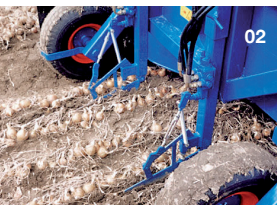

OT & WR ONION HARVESTERS WORLDCLASS EXPERIENCE

ASA-LIFT is a world leader in the production of machines for the harvesting of onions. Our product range covers a complete line of onion toppers, onion lifters and onion loaders. The machines are built to fulfill the demand of growers worldwide and the small grower as well as the largest industries will find a machine suitable for their conditions. Furthermore, we are specialized in custom-built machines.

ASA-LIFT OT-series ensures efficient topping of onions before windrowing. The OT-series covers machines for 150, 180, 200 and 225 cm bed system. The machines are with 3-point linkage and are available as front or rear mounted models. 3 sets of rotating knives raise the leaves, cut the top and blow it into the right wheel track. The cutting height is hydraulically adjustable by 4 support wheels. The machines are mechanically driven by the tractor's PTO-shaft.

Leaves, which are cut of, are deposited in the right wheel track.

01

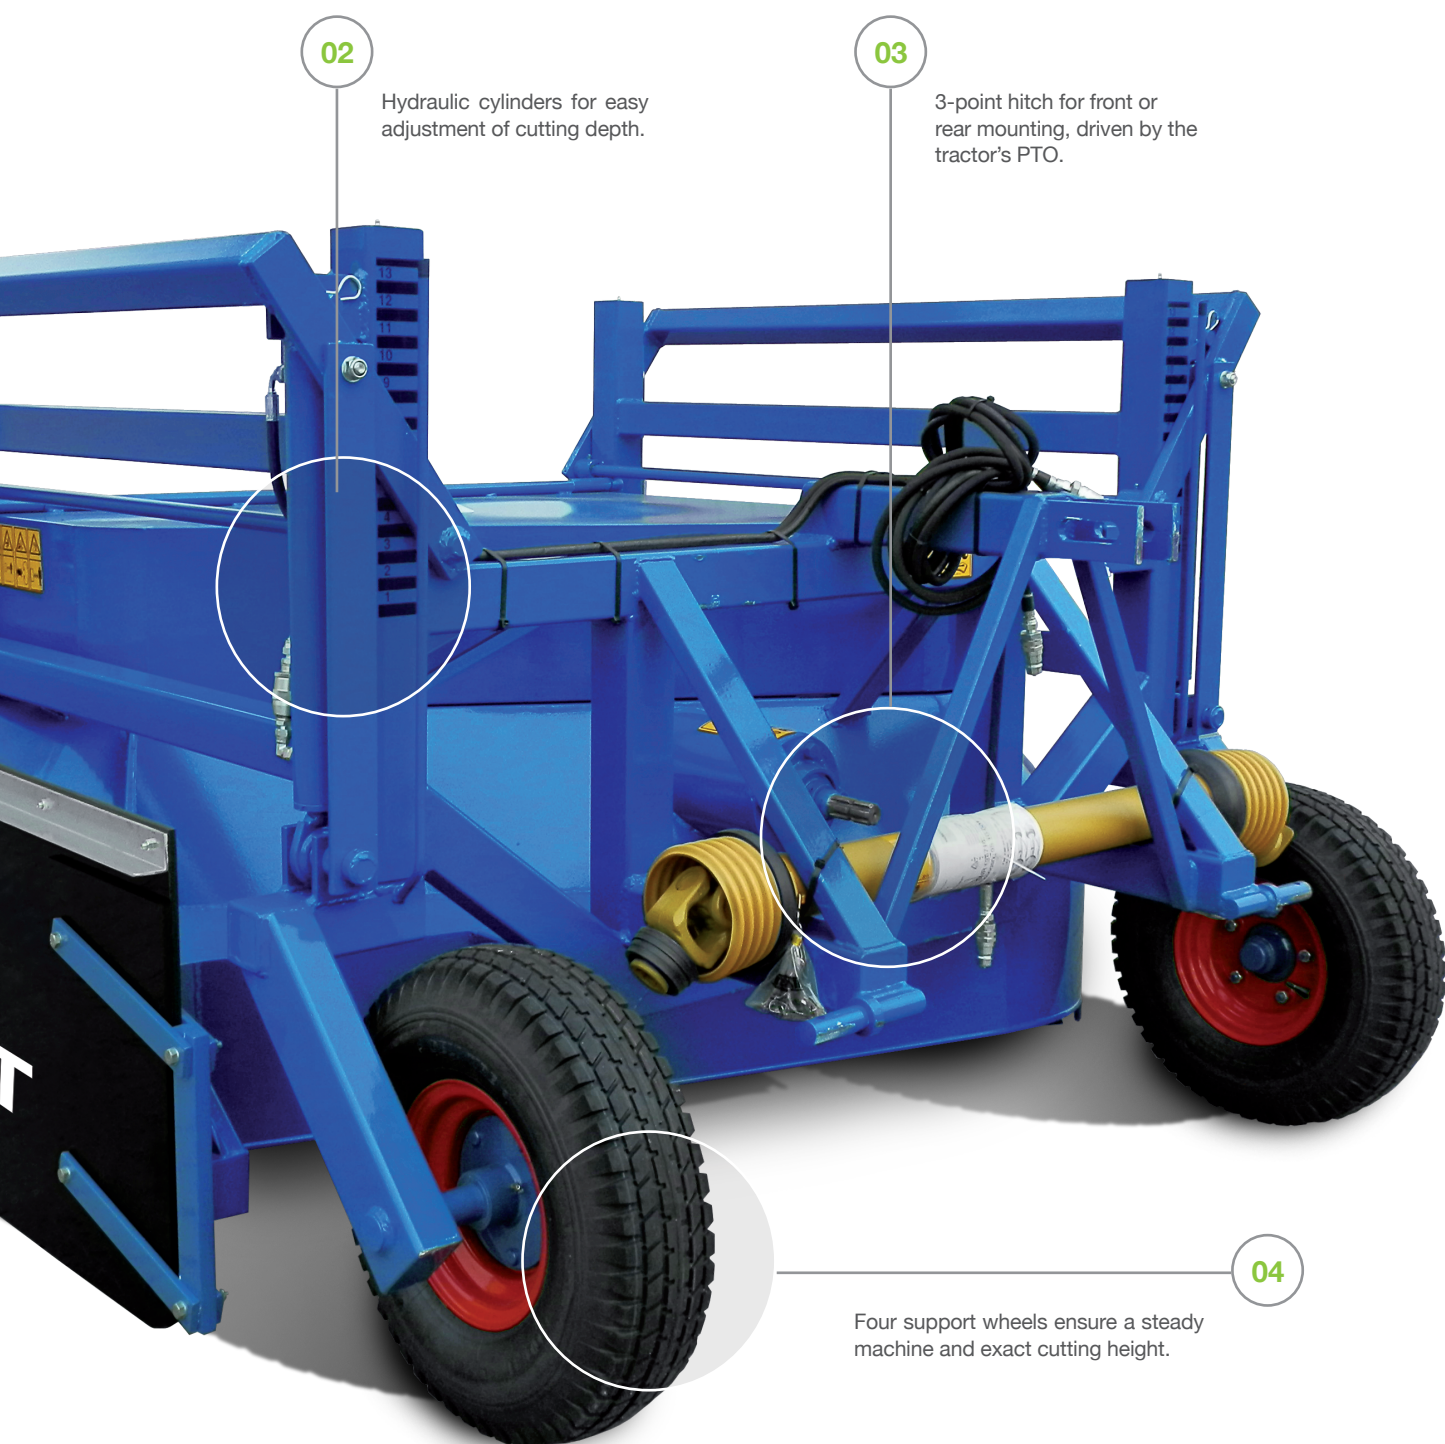

01

Rotating knives for lifting and cutting of leaves.

02

Automatically controlled cutting height is optional.

02

Hydraulic cylinders for easy adjustment of cutting depth.

03

3-point hitch for front or rear mounting, driven by the tractor's PTO.

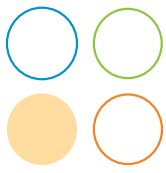

04

Four support wheels ensure a steady machine and exact cutting height.

03
Front mounted OT-1500

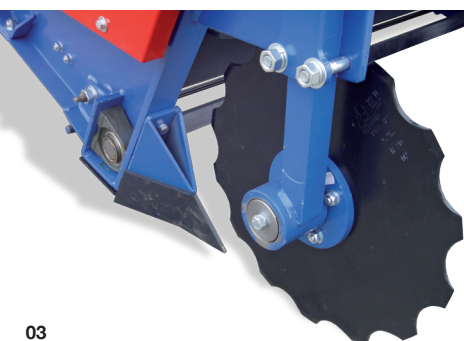

WR SERIES HIGH QUALITY ONION HARVESTERS

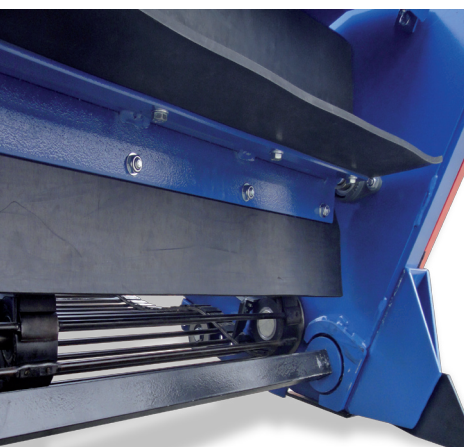

01
Pressure roller for levelling
of bed before onions are
placed.

02
Hydraulic tailgate to
prevent onions from falling
on headlands.

03

04

WR-SERIES

The WR-series is a new-designed windrower, which ensures efficient windrowing, reliability and low running costs. The WR-series is available from 135 to 200 cm working width. The machines have 2 webs and are mounted with a manually adjustable shaker.

The windrowers can be delivered with rotating shaft and rubber paddle or with a full share. 2 rotating discs cut the leaves on the side of the bed system. From the machines the onions are gently placed on the bed by an adjustable PVC-depositor. The working depth of the machine is controlled by the tractor or by the front-mounted support wheels. The windrower is driven by the tractor's PTO-shaft.

03

Serrated disc for the cutting of leaves on the side of the beds.

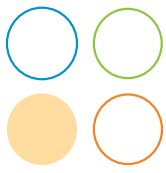

04

Rotating shaft and rubber paddle for lifting of onions.

05

Heavy-duty share point for working in hard soil.

OT300 & WR300 FOR THE LARGEST GROWERS!

01
Independent suspension
of each pick-up section.

300-SERIES

For the largest onion growers, ASA-LIFT offers a triple bed system solution.

The OT300 is a unique triple onion topper, which secures very accurate topping of onions. The 3 cutting units, which are mounted with flail toppers and rotating knives, have fully independent suspension. The machine is trailed and is fully hydraulically driven.

The WR300 is a trailed windrower with 3 separate pick-up sections. The 3 beds, which are lifted in one pass, are deposited in 2 lines behind the machine. Each pick-up section has independent suspension. The machine is fully hydraulically driven.

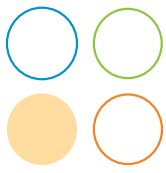

TO ENSURE THE BEST SOLUTION TO YOUR OWN REQUIREMENTS, WE RECOMMEND THAT YOU CONTACT YOUR NEAREST IMPORTER OR ASA-LIFT.

02
Flails and knives ensure very accurate topping.

03
Leaves are deposited into the wheel tracks.

SL63/SL122E & SL122ES **HIGH QUALITY** ONION LOADERS

01

Hedgehog belt for additional cleaning of onions.

02

SL63 E / SL122 E / SL122 ES

ASA-LIFT's line of onion loaders includes 3-point linkage machines as well as trailed machines. The SL63 E is a 3-point mounted machine with a 63 cm wide pick-up section. From the pick-up section, the onions are transported to the trailer by a 63 cm wide elevator. The machine is hydraulically driven and can be supplied with a wide range of equipment to optimize the machine for the given conditions.

The SL122 E is a trailed onion loader with a 122 cm wide pick-up section. From the pick-up section the onions are loaded direct into the elevator. The SL122 ES model has an additional web integrated before the elevator in order to secure more cleaning. The SL122 ES also offers the option of an inspection platform for 2 persons on the machine. The SL122 machines are hydraulically driven and can be supplied with a wide range of equipment to optimize the machines for the given conditions.

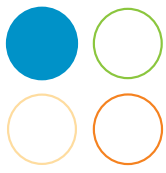

02

Additional web unit (SL-122ES)
for extra cleaning.

03

Inspection platform for
2 persons (SL-122ES).

ASA-LIFT WORLDWIDE

As a market leader in the niche of vegetable harvesting, worldwide representation is natural for ASA-LIFT. Through selected importers with specialist knowledge of their market, ASA-LIFT always offers professional guidance.

As an ASA-LIFT customer you are guaranteed the latest development in vegetable harvesting!

01

A considered balance between own production and drawing on the expertise of suppliers secures ASA-LIFT its unique flexibility.

02

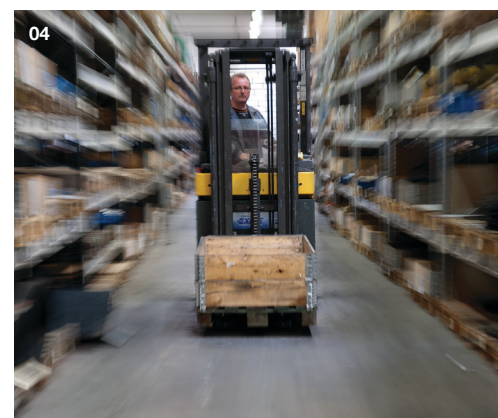

All our production is handled on our premises in Sorø – Denmark.

ASA-LIFT is a leading international company developing, producing and distributing vegetable harvesters. For more than 75 years ASA-LIFT machines have been sold all over the world.

Since the beginning of mechanized vegetable harvesting, ASA-LIFT has been focused on the possibilities and challenges worldwide. Through regular meetings with vegetable growers from all over the world, combined with our strong focus on innovation we are able to provide an attractive, unique and broad product range of high quality. Taking basis in our work in the vegetable fields worldwide, we constantly adapt our machines to the given conditions and present demands.

03
All machines are produced, assembled and tested in Soro.

04
ASA-LIFT offers a full back-up with service and spare part supply – 365 days a year – year after year.

As an ASA-LIFT **CUSTOMER** you are always guaranteed the latest development in vegetable harvesting!

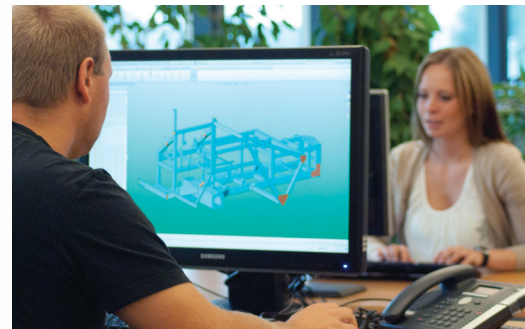

QUALITY IS NOT SOMETHING YOU SELL – IT IS AN ATTITUDE AND A WAY OF THINKING

When you contact ASA-LIFT or our dealers you will meet a company with one goal – to fulfill your request! An open discussion of the project will outline possible solutions to your request. In the process of defining the project, ASA-LIFT draws on / offers great experience gathered from all over the world. Subjects as growing method, season, soil type as well as flexibility and capacity are natural elements to discuss in the process.

When the project is thoroughly examined, ASA-LIFT will make a quotation for a solution to your request, and

together we will adjust the project proposal in order for you to get the specific solution that suits you.

When the machine has been built and delivered, ASA-LIFT will carefully follow the project in order to ensure a successful start-up and implementation. From years of experience, we know that the machine is not delivered until it is running in the field, fulfilling the need of its owner.

We aim at working together with the professional growers in order to develop the most efficient and cost effective solutions possible. With ASA-LIFT the harvesting of vegetables should be easier and more profitable. We want to supply high quality machines and professional after sales service.

OUR VISION

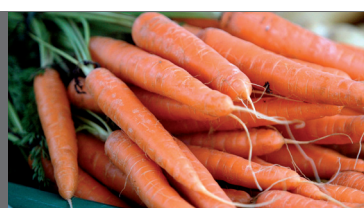

ASA-LIFT shall remain a competitive and international market leader of high quality products and services for tomorrow's vegetable growers.
