## Jubilee promotion EDITION 1000

**GRIMME celebrates the 1000th VARITRON this year!**

This major milestone is proof of our experience, service and the trust our customers place in GRIMME self-propelled harvesting technology.

To mark the jubilee, there are attractive offers for a limited time period on the full range of self-propelled harvesters.

In celebration of this special occasion, the VARITRON 470 and VARITRON 470 Platinum TERRA TRAC will be released as a special edition in limited quantities.

**GRIMME**

# Nothing can stop it

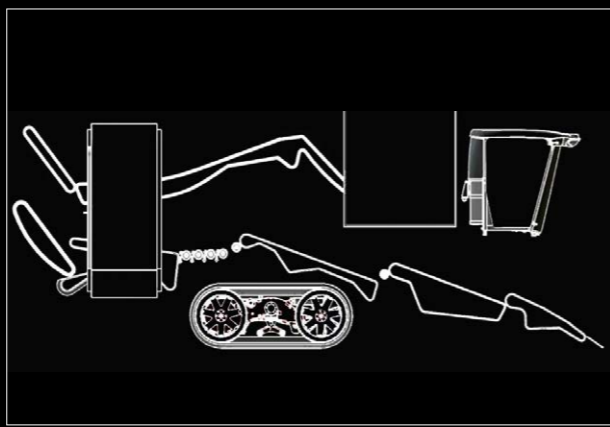

## VARITRON 470 | VARITRON 470 Platinum TERRA TRAC

Self-propelled harvesters excel with the perfectly matched combination of performance, driving comfort and manoeuvrability. The resulting harvest reliability, even under the most difficult conditions, plays a decisive role in many cases. With the VARITRON 470 and the VARITRON 470 Platinum TERRA TRAC, GRIMME offers 4-row self-propelled harvesters, which can be equipped with a wide range of different separators. Choose your favourite with large-volume wheels or ground-protecting rubber tracks with a contact area of 1.6 m<sup>2</sup> each.

### Straight crop flow across the entire width.

The continuous main web channel ensures an effective distribution of the harvested crop across the entire sieving surface. At the same time, the flat angles of the main webs protect the crop during transport towards the separators, which are also installed across the entire width of the machine.

### Crop protective arrangement of the separators

Benefit from the wide range of separators and the almost limitless combination possibilities. The arrangement of the separators is designed for maximum crop protection.

### Telescopic front axle with weight shifting

For machines with a row width of 75 cm, the right front wheel can optionally shift out by 30 cm so that a larger wheel can be fitted. In addition, a second cylinder is fitted to the front axle so that 1000 kg can be transferred from the left tyre to the right tyre.

### Intuitive Operating Concept

The unique ErgoDrive operating concept provides the basis for a convenient workplace. For satisfied work: A multi-functional joystick and keypad which is located in the ergonomic armrest, both with the possibility of individual programming of all main functions are integrated to fulfil all the requirements of the driver.

## EDITION 1000

To honour the anniversary of the 1000th VARITRON, equipment packages are available for the VARITRON 470 and VARITRON 470 Platinum TERRA TRAC. Order your VARITRON for this purpose within the specified time period and receive a variety of additional options for a special promotion price of 1000 €!

### Equipment package VARITRON 470 „EDITION 1000“

Premium comfort cab	
Additional lighting: 6 extra LED-working lights	
Auto pilot	
Speedtronic web	
Rear left wheel Michelin MegaXBib 900/60 R32	
Price with normal configuration	13385 €
<b>Jubilee promotion price</b>	<b>1000 €</b>

### Equipment package VARITRON 470 Platinum TERRA TRAC „EDITION 1000“

Premium comfort cab	
Additional lighting: 6 extra LED-working lights	
Auto pilot	
Speedtronic web	
Automatic greasing system	
Price with normal configuration	16440 €
<b>Jubilee promotion price</b>	<b>1000 €</b>

## Special edition

### Still not enough?

In conjunction with the "Edition 1000" equipment package, you also have the option of receiving your VARITRON 470 and VARITRON 470 Platinum TERRA TRAC as a limited special edition free of charge!

The special edition is available in very limited quantities and includes the following features:

- > Black rims\*
- > Drivers Package
- > Doormat with GRIMME logo
- > Mobile phone holder
- > LED beacon lights

\*VARITRON 470 with black rims on the front and rear axle, VARITRON 470 Platinum TERRA TRAC with black rims on front axle. Only in combination with certain wheel combinations on the front axle.

# A real allrounder

VARITRON 220 Platinum TERRA TRAC | VARITRON 270 Platinum |  
VARITRON 270 Platinum TERRA TRAC

With the two-row VARITRON, GRIMME offers self-propelled harvesters that can be equipped with both a 2 t overloading bunker and a 7 t NonstopBunker. In addition to the enormous range of different separators, you can also choose between a wheeled chassis and rubber tracks. Furthermore, the numerous automatic functions take the strain off the driver, even during long working days.

## NonstopBunker

The VARITRON 270 Platinum and VARITRON 270 Platinum TERRA TRAC are equipped with the 7-tonne NonstopBunker. The ingenious design of the GRIMME NonstopBunker allows the bunker floor to be reversed without additional damage to the crop.

## Real nonstop digging

The VARITRON 220 Platinum TERRA TRAC is equipped with a 2 t intermediate bunker with 1200 mm wide overloading elevator directly behind the cab. This means that transport vehicles and boxes can be filled without any problems during the harvesting process.

## Wide range of separators

You have the choice of a wide range of separators to match your local harvesting conditions. The MultiSep, for example, performs also on cloddy, sticky soils and soils containing small stones a low-loss and effective trash separation.

## Comfortable working position

From the Premium Comfort cab, you have an excellent view onto the intake unit. Coupled with the ErgoDrive operating concept and many other features, the driver always stays focused and well-relaxed.

# The Transformer

## VENTOR 4150

Discover the revolution of harvest technology and a new performance class: VENTOR 4150! In order to meet the high demands of our customers, we have engineered the first four-row, self-propelled potato-harvester which is based on the well proven SE-principle. The development focused in particular on lowest operating costs, highest operational reliability and maximum crop protection.

### Gentle crop flow through the entire machine

Thanks to the integration of the well proven "SE-principle", a combined separating device for sieving, conveying and haulm separation, there are extremely low drop heights for the crop in the entire machine.

### For fast turning manoeuvres

Thanks to a four-wheel steering system, fast turning manoeuvres can be carried out with an inner turning circle of just 6.1 metres. This means that even small headlands do not pose any problems.

### Self-propelled harvester on velvet paws

In addition, the wheel system with "crab steering" enables a low-impact travel on the field: The machine covers the entire surface in an even way. Despite the "crab steering", the patented sieving system ensures a smooth and regular transition between the first and second main webs.

### Equipped for long and tough haulm in potato crops.

The VENTOR 4150 can now be optionally equipped with the HT 400 haulm topper, which is especially suitable for extremely high quantities of long, tough potato haulm.

# The largest in its class

With a powerful engine of 530 hp and a huge overloading bunker with a capacity of up to 15 tonnes, harvest output can be significantly increased, compared to 2-row SE-systems. With a volume of 22.5 m<sup>3</sup>, the VENTOR 4150 offers the largest bunker on the market. The long transfer distance of the boom allows overloading onto a transport vehicle driving in the spraying track. The unloading time of the complete bunker volume takes just 60 seconds!

## LARGE BUNKER PROMOTION

In the course of the VARITRON jubilee campaign, the VENTOR 4150 also benefits: Decide early for your VENTOR 4150 and get a discount of 1000 € per tonne bunker capacity for a short time. The largest bunker on the market thus grants you a discount of 15000 € in the given period! In addition, you will also receive one of the popular Drivers Packages free of charge with your purchase.
