

SL SERIES

The SL series The GRIMME store loader for ranges of up to 20.7 m with belt widths of 65-90 cm.

SL 125 / SL 145

The Store Loader with its 65 cm wide belt is the ideal choice for medium sized farms. The machine impresses with its easy operation and excellent storage capabilities for potatoes, onions, carrots, or grain. Its large pivot wheel allows for maximum maneuverability, reducing the need to reposition the machine frequently.

Highest conveying capacity and crop protection

The trough-shaped belt, featuring the reliable GRIMME profile with flights, allows for maximum carrying capacity and gentle handling of the produce. This is achieved through the “walking side walls,” which move without differential speed in relation to the conveyor frame.

Partial automation

The swivelling limiter, which is available as standard, enables convenient semi-automated operation of the store loader. Using two sensors the store loader is swivelling continuously between the programmed limits (walls). The sensors automatically detect obstacles, preventing a collision. To restrict the swivel range further, limiting panels can be set up.

Comfortable operation

The easy-to-use control box is ideally matched to the machine functions. Its ergonomic shape with the sturdy toggle switches and the 15 m long cable offer a high degree of flexibility.

Infinitely adjustable belt speed

The conveying speed can be easily adjusted using manual control valves.

Filling funnel as an option

This filling funnel is especially well-suited for transporting grain. Made from stainless steel, it comes with additional seals to connect seamlessly to the conveyor belt, enabling direct feeding from trailers.

SL 700

The SL 716 store loader, with a conveyance length of up to 17.7 meters and a belt width of 66 centimeters, is ideal for storing potatoes, onions, beetroot, celery, and other bulk materials. For enhanced crop protection and a wider swivel range, the optional 'Quantum-belt' is available as an option.

SL 900

The SL 900 series features two models, the SL 916 and SL 919, with conveying lengths ranging from 9.7 meters to 19.5 meters and a belt width of 90 centimeters. Both models offer the optional 'Quantum-belt' for enhanced crop protection and an extended swivel range.

Comfortable operation

The machine is controlled using the IBX 200 ISOBUS operator unit. It can also be equipped with additional features, such as a remote control and a CCI 800 operator terminal.

Highest conveying capacity and crop protection

The trough-shaped belt, featuring the trusted GRIMME profile of flights, allows for maximum conveying capacity and gentle storage. This is achieved through the "walking side walls," which move without any speed difference relative to the conveyor frame.

Automatic store hall filling functions StoreMatic

Two levels of StoreMatic are available to meet different customer needs. Higher levels offer more sensors to assist with filling the potato storage and to automate the storage process.

Optimal crop protection.

Quantum principle: Optimised crop flow as well as improved crop protection due to constantly low infeed height onto the "Quantum-conveyor", independent of the swivel angle of the store loader.

Fast and intuitive machine setting

StoreMatic, when used with the CCI 800 ISOBUS operator terminal, allows for quick and convenient storage and retrieval of various machine settings when required.

Filling funnel as an option

This filling funnel is especially suitable for conveying grain. Made from stainless steel, it includes additional seals for the conveyor belt and allows for direct feeding from trailers.

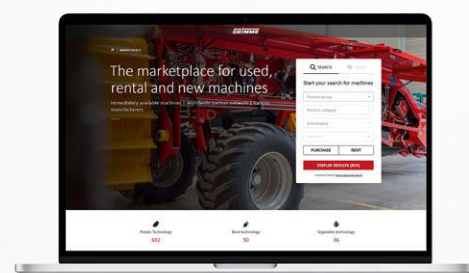

GRIMME regardless of brand used and more

Sell your used machinery

- > Get your non-binding offer
- > Payment before pickup on site possible
- > Simple sales process
- > Pick up of your machine free of charge

Receive a non-binding offer for your used potato-, beet- and vegetable technology from GRIMME or other well-known manufacturers.

Digital. Simple. Connected - myGRIMME

myGRIMME is your gateway to the digital world of GRIMME. With your account, you always have your virtual machine file with all digital services and information with you in real time. In addition, your machine tasks are automatically documented and analysed clearly. Furthermore, with the webshop you have the possibility to order spare parts online. myGRIMME can be used on any internet-enabled device and is free of charge for you.
