

NEW!

GRIMME

New spiral rollers for the RS separator

The new spiral rollers offer many advantages thanks to significantly less abrasion, material optimisation, increased hardness and an attractive price. The roller separator is ideal for harvesting large potatoes and is particularly suitable for use in wet, clayey or loamy soils.

NEW

Art. No. 076.10824

The significantly larger, wider and stronger rubber lip on the spiral roller enables improved throughput and ensures high separation performance.

OPTIMISED

Art. No. 076.01554

The spiral roller with optimised material composition ensures effective and gentle separation.
